ALSCO UNIFORMS®

# Professionally Cleaned for Maximum Performance

## WASH & TREATMENT

*Washed at >60°C with chemicals in an industrial washer/extractor*

1. Mats are loaded into the washer/extractor.
2. Appropriate wash programme is activated.
3. Clean mats are unloaded onto the conveyer ready for the drying process.

## DRYING & FINISHING

*Mats are dried in industrial dryers, where residual moisture and fine dust are removed*

1. Mats are loaded from the conveyer to the dryer.
2. Mats are tumble dried at high temperature for 15 minutes.
3. Dried mats are unloaded ready for inspection and rolling.

## FINAL INSPECTION

*Final checks ensure every mat meets our quality standards before returning to service*

1. Damaged mats sent for repair.
2. Non-compliant mats removed from service.
3. Stained mats returned for treatment.
4. Approved mats prepared for service.
