ALSCO UNIFORMS®

Professionally Cleaned for Maximum Performance

WASH & TREATMENT

Washed at >60°C with chemicals in an industrial washer/extractor

1. Mats are loaded into the washer/extractor.
2. Appropriate wash programme is activated.
3. Clean mats are unloaded onto the conveyer ready for the drying process.

DRYING & FINISHING

Mats are dried in industrial dryers, where residual moisture and fine dust are removed

1. Mats are loaded from the conveyer to the dryer.
2. Mats are tumble dried at high temperature for 15 minutes.
3. Dried mats are unloaded ready for inspection and rolling.

FINAL INSPECTION

Final checks ensure every mat meets our quality standards before returning to service

1. Damaged mats sent for repair.
2. Non-compliant mats removed from service.
3. Stained mats returned for treatment.
4. Approved mats prepared for service.
